VSMR designed and developed a Proprietary Hardware/Software Solution that solves Credit/Debit Card fraud by using two Factor Authentication.

As ID theft and Credit/Debit card fraud surpassed \$56 Billion annually, the need for secure payment authentication grows exponentially. **VSMR's** technology adds a new layer of security to existing protocols, by notifying the cardholder of each and every purchase through the card holder's own cellular phone, thus enabling the cardholder to approve or decline his or her purchase via a secure PIN (personal identification number)

The **VSMR solution has reduced fraud to zero** in earlier production pilots. **VSMR's** proven and highly scalable solution is gaining worldwide attention and placing VerifySmart at the forefront of the fraud prevention revolution.

****VSMR** Initiates card fraud prevention dialogue with several of Asia's largest Banks.

The Asian Pacific Market represents a GREAT Market opportunity for the **VSRM** and its portfolio of financial and technology service applications
